

Products	Description	Application
LUVOGEL® W1	Montmorillonite	LUVOGEL® W1 is used in water-based formulations, e.g. adhesives, paints and coatings, cleaning agents, polishes, etc. It produces a pseudoplastic flow profile with thixotropic properties and improves settling behavior and flow control.
LUVOGEL® W3	Montmorillonite	LUVOGEL® W3 is used in water-based formulations, e.g. adhesives, paints and coatings, cleaning agents, polishes, etc. It produces a pseudoplastic flow profile with thixotropic properties and improves settling behavior and flow control.
LUVOGEL® AQ	Synthetic Hectorite	LUVOGEL® AQ is mainly used as a rheological additive in water-based formulations. The main areas of application are industrial coatings and automotive paints - OEM as well as After-Market. The products provide excellent stabilisation and orientation of effect pigments.
LUVOGEL® W2N	Synthetic Hectorite	LUVOGEL® W2N is mainly used as a rheological additive in water-based formulations. The main areas of application are industrial coatings and automotive paints - OEM as well as After-Market. The products provide excellent stabilisation and orientation of effect pigments.
LUVOGEL® WS1	Synthetic Hectorite	LUVOGEL® WS1 is a synthetic smectite clay modified by an inorganic sodium phosphate. It is used as a rheological additive in water-based formulations.
LUVOGEL® WS2	Synthetic Hectorite	LUVOGEL® WS2 is a synthetic smectite clay modified by an inorganic sodium phosphate. It is used as a rheological additive in water-based formulations.
