

**LUVOTIX® Manufacturer: Lehmann&Voss&Co.**

Products	Description	Application
<b>LUVOTIX® R</b>	Castor oil derivative	For various applications in low to medium polar systems at moderate temperatures
<b>LUVOTIX® R-RF</b>	Castor oil derivative, inorganically modified	Free-flowing and easy dispersible for highly filled systems
<b>LUVOTIX® ZR 50</b>	Castor oil derivative, inorganically modified	For use in solvent-free and high solid formulations such as putties and sealants
<b>LUVOTIX® HT</b>	Castor oil derivative, polyamide-modified	Temperature stabilized, for various applications in low to medium polar systems
<b>LUVOTIX® HT-SF</b>	Castor oil derivative, polyamide-modified	Fine grade of LUVOTIX HT, for easier activation
<b>LUVOTIX® ZH 5</b>	Castor oil derivative, polyamide-modified, with inorganic content	Free-flowing and easy dispersible
<b>LUVOTIX® ZH 50</b>	Castor oil derivative, polyamide-modified, with inorganic content	For highly filled systems containing medium to higher polar solvents
<b>LUVOTIX® R400</b>	Castor oil derivative	Process additive and flow modifier
<b>LUVOTIX® HT400</b>	Castor oil derivative, polyamide-modified	Process additive and flow modifier
<b>LUVOTIX® HP</b>	Polyamide	For solvent-based and -free systems of medium and higher polarity
<b>LUVOTIX® AB</b>	Blend of polyamides	Sag control in high gloss and highly filled systems of medium and higher polarity
<b>LUVOTIX® SAB</b>	Blend of polyamides	Sag control and anti-settling action, especially recommended for high-gloss systems based on acrylate or polyester
<b>LUVOTIX® PAB</b>	Blend of polyamides	Control of rheological properties in gloss top-coats and in primers

Products	Description	Application
<b>LUVOTIX® P 100-15</b>	Polyolefin	Anti-settling, slight viscosity increase
<b>LUVOTIX® VP031</b>	Polyolefin/stearic acid derivative hybrid	Easy activation, for high built coatings, sealants and adhesives based on MS-polymer
<b>LUVOTIX® P25X</b>	Polyolefin paste, 25% in xylene	Anti-settling action and sag control
<b>LUVOTIX® PA2080-1</b>	Polyamide pastes, 20% in xylene/alcohol	Anti-settling action, sag control and thixotropy
<b>LUVOTIX® PA2080-1B</b>	Polyamide pastes, 20% in butyl acetate/alcohol	Anti-settling action, sag control and thixotropy
